Paper 1 Theory

October/November 2023

1 hour 30 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- You may use an HB pencil for any diagrams, graphs or rough working.

INFORMATION

- The total mark for this paper is 80.
- The number of marks for each question or part question is shown in brackets [].
- No marks will be awarded for using brand names of software packages or hardware.

This document has 12 pages. Any blank pages are indicated.

1		er needs to create a validation check for product numbers. Three examples of product numbers to check are:	bers
	977	135120127916	
	976	143148163921	
	845	132120651166	
	lder	ntify two validation checks he could use to check the numbers.	
	1		
	2		
			[2]
2	A st	tudent has created a document with images for her geography project.	
	(a)	The layout of page one is portrait orientation. The student needs to set page two as landscorientation. Before she can set the landscape orientation she needs to insert a break.	ape
		State the type of break that is needed.	
			[1]
	(b)	The student has placed images in the document.	
		State two file formats she could have used for the images.	
		1	
		2	
			[2]
	(c)	Each page of the document includes a footer.	
		Explain why a footer is used.	
			[3]

- 3 A teacher is setting up a school shop. The teacher is setting up a spreadsheet to keep the accounts of the shop.
 - (a) Fig. 3.1 shows a box containing 50 Choco Bars to sell in the shop. The information on the box will be entered into the spreadsheet.

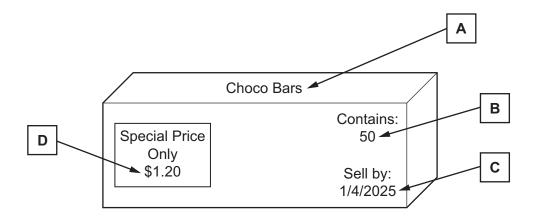

Fig. 3.1

State the most appropriate display format in the spreadsheet for each piece of data shown on the box. Your answer must be different in each case.

	A	
	В	
	C	
	D	
		[4]
(b)	Each box delivered to the school shop includes a QR code.	
	Explain why QR codes are used.	

[4]

(c) The teacher has created a formula in the spreadsheet that calculates the cost of purchasing a number of different items.

She has created a formula that:

- subtracts the discount per item from the price of the item to find the cost of the item
- then multiplies the cost of the item by the quantity.

Z	А	В	С	D	E	F
1	Product	Price of item	Discount per item	Quantity	Total	
2	Choco Bar	\$1.20	\$0.20	15	-\$1.80	

The formula she enters into cell E2 is:

=B2-C2*D2

When this formula is entered into cell E2 the result is **not** what she expected. The result should be \$15.00

Explain why the result was not \$15.00						
	[2]					
	L - .					

a)	Explain how a user ID and a password are used to increase the security of data.
))	The company plans to improve the security of its computer system by using biometric met
))	
))	The company plans to improve the security of its computer system by using biometric met
))	The company plans to improve the security of its computer system by using biometric methods. Give two examples of biometrics.
))	The company plans to improve the security of its computer system by using biometric methods. Give two examples of biometrics.
))	The company plans to improve the security of its computer system by using biometric methods. Give two examples of biometrics.
)	The company plans to improve the security of its computer system by using biometric methods. Give two examples of biometrics.

A student needs to purchase a new computer for use on his university course.

The laptop computers available to him are one that contains a solid-state drive (SSD) or one that only stores data on the internet, using the cloud.	at
Evaluate these two types of laptop computer.	

[6]

•	cuss the benefits and drawbacks of using a computer model before building a bridge.
 Roc	
	ckit Aircraft manufactures and flies aeroplanes.
	ckit Aircraft manufactures and flies aeroplanes. The pilots at Rockit Aircraft are trained using extended reality.
	ckit Aircraft manufactures and flies aeroplanes.
	ckit Aircraft manufactures and flies aeroplanes. The pilots at Rockit Aircraft are trained using extended reality.
Roc (a)	ckit Aircraft manufactures and flies aeroplanes. The pilots at Rockit Aircraft are trained using extended reality.

(b)	Some of the components used in the manufacture of aircraft are produced using a 3D printer.
	Analyse the use of a 3D printer to make the components rather than making the components by hand.
	[6]
The	ny devices in the home can be connected to the internet so they can be controlled remotely. ese devices are called smart devices. A house contains a smart security system. Describe the benefits and drawbacks of using a smart security system.
()	
	[4]

(b)	Identify two sensors that could be used with the smart security system. 1	
	2	[2]
(c)	Part of the smart security system involves an automatic gate for vehicles approaching house. There is a CCTV camera at the gate and the smart security system has software recognising each vehicle's number plate.	
	Explain how automatic number plate recognition (ANPR) systems work.	
		[4]
(d)	Describe three problems that could occur when the ANPR system reads a vehicle number plate.	er
		[3]

	e secretary of Tawara University has created web pages for former students. The former students. adults.	ents
(a)	State the design features of the web pages that would meet the needs of this target audie	nce.
		[6]
(b)	The web pages conform to the university's corporate house style.	
	Describe why a corporate house style is used.	
		[2]
		[3]
(c)	Give four design features of a corporate house style.	
	1	
	2	
	3	
	4	.
		[4]

A s	chool h	as employed a systems analyst to help update its computerised examination syster	n.
(a)		ystems analyst researches the current system to see what will be required in the ystem.	
	State	the methods of researching the current system that are described:	
	(i)	talking to the network manager and examinations officer about the current system	
			[1]
	(ii)	watching the users operating the current system	
			[1]
	(iii)	forms sent out to all users to complete and return.	
			[1]
(b)		completing the analysis, the new system needs to be designed. One item that need signed is a file structure.	s to
	Identi	y three other items that would need to be designed.
