Paper 1 Computer Systems

October/November 2023

1 hour 45 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- Calculators must not be used in this paper.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].
- No marks will be awarded for using brand names of software packages or hardware.

This document has 12 pages.

1	Malware can be used to corrupt data stored on a computer.											
	(a)	Tick	(√) one bo	x to show	which o	cyber sec	urity thre	at is not	a type of	^f malwar	e.	
		Α	Phishing									
		В	Ransomwa	re								
		С	Virus									
		D	Worm									
												[1]
	(b)	lder	ntify one othe	er exampl	e of ma	alware tha	an those	given in Į	part 1(a).			
												[1]
	(c)	lder	ntify the type	of softwa	re that	is used to	find and	d remove	malware	from a	computer.	
												[1]
2	Δre	niste	er stores the	hinary nu	mher [.]							
-	7110	giote									7	
			1	1	1	0	0	0	1	1		
	(a)	Giv	e the denary	number f	or the b	inary nui	mber sto	red in the	register.			
												[1]
		Wo	rking space									
	(b)	Giv	e the hexade	ecimal nur	nber fo	r the bina	ry numb	er stored	in the re	gister.		
												[2]
		Wo	rking space									

(c) A logical left shift of two places is performed on the binary number stored								stored in	the registe	er.
Complete the binary register to show its contents after this logical left shift.										
										[1]
(d)	The negative	denary nu	mber -99	needs t	o be stor	ed in the	register.			
	Complete the complement.				nary nur	nber tha	t would	be stor	ed, using	two's
	Working space	9								
	Register:									ro1
(e)	The number 0	1001100 i	s added t	to 111000	011					[2]
	Add the two 8	-bit binary	numbers	s, using b	oinary add	dition.				
	Give your ans	wer in bina	ary. Shov	v all your	working

										[4]

A user's computer has a central processing unit (CPU) that has a clock speed of 2 GHz.

3

4

She	e war	nts to change it to a CPU that has a clock speed of 3 GHz.	
(a)	(i)	State what is meant by clock speed.	
			[1]
	(ii)	Explain the effect this change will have on the performance of the CPU.	
			[2]
(b)	The	e CPU contains a memory address register (MAR).	
	Des	scribe the role of the MAR in the fetch-decode-execute cycle.	
			[2]
(c)	The	e CPU has a list of all the machine code commands it can process.	
	Sta	te the name of this list of commands.	
			[1]
Αw	ashir	ng machine is an example of an embedded system.	
(a)	Giv	e two characteristics of an embedded system.	
	1		
	2		
			[2]

(b) Circle **three** other examples of an embedded system. freezer laptop personal computer (PC) security light system smartphone vending machine web server [3] 5 A band is recording their new song. They need to consider the sample rate and sample resolution of their recording. (a) Give **one** benefit of using a higher sample rate to record the song. **(b)** Give **one** drawback of using a higher sample rate to record the song. (c) Describe what is meant by sample resolution. (d) The band wants to compress the sound file, but they do **not** want any data to be permanently removed. Identify the compression method that should be used.[1] **6** The table contains descriptions about data transmission methods.

Complete the table by identifying which data transmission methods are described.

Data transmission method	Description
	Data is transmitted down a single wire, one bit at a time, in one direction only.
	Data is transmitted down multiple wires, multiple bits at a time, in both directions, but only one direction at a time.
	Data is transmitted down a single wire, one bit at a time, in both directions at the same time.
	Data is transmitted down multiple wires, multiple bits at a time, in one direction only.

[4]

7 A train station has a ticket inspector who checks each customer's ticket before they are allowed to get on the train.

The train station wants a system that will allow the tickets to be automatically checked.

(a)	Identify two suitable input devices that can be used to automatically read the tickets.							
	1							
	2							
	[2]							

(b) The train driver pushes a button to close the train door when all passengers have boarded

the train. The train door will only close when there are no passengers in the doorway.
The system to check there are no passengers in the doorway uses a sensor and a microprocessor.
Explain how the sensor and the microprocessor are used to check whether the train door can be closed.
[6]

8	(a)	Draw and annotate a diagram that demonstrates the cyber security threat of data interception.
		[4]
	(b)	Identify one security solution that will help keep data safe from data interception and state why it will help keep the data safe.

9 The table contains terms and descriptions about the internet.

Complete the table with the missing terms and descriptions.

Term	Description
	the collective name for all the web pages available
	a small text file, stored by the web browser, that can store a user's personal data
uniform resource locator (URL)	
web server	
	the language used to create a website. Example tags are <head> and <body></body></head>
	a protocol that is used to request and send web pages

10	A business has a system that is described as having artificial intelligence (AI).								
	(a)	State one of the main characteristics of an AI system.							
	(b)	An Al system is an expert system.	[1]						
		Explain how an expert system operates.							
			[6]						
11	A m	nanufacturing company uses an automated system in its manufacturing process.							
	(a)	The automated system uses a flow sensor.							
		Identify what a flow sensor measures.							
			[11						
			[,]						

	(b)	Explain one advantage to employees of using an automated system in manufacturing.
		[2]
	(c)	Explain one disadvantage to the company owner of using an automated system in manufacturing.
		[2]
12	Digi	tal currency can be used to pay for products and services.
	Digi	tal currencies are often tracked using digital ledgers.
	(a)	Give two other features of digital currency.
		1
		2
		[2]
	(b)	Identify the process that uses a digital ledger to track the use of digital currency.
	` ,	[1]

13 Storage and memory are important components of a computer system.

(a)	Primary storage is one type of storage in a computer system.								
	(i)	Ticl	x (✔) one box	to show which is	an example o	of primary s	torage.		
		Α	compact dis	k (CD)					
		В	hard disk dr	ive (HDD)					
		С	random acc	ess memory (RAM	M)				
		D	solid-state d	rive (SSD)				[1]	
	(ii)	Giv	e one charac	teristic of primary	storage.				
								[1]	
(b)	Virt	ual n	nemory can b	e created in a cor	mputer system	۱.			
	Cor	nple	te the descrip	tion about virtual	memory.				
	Use	the	terms from th	ne list.					
	Sor	ne o	the terms in	the list will not be	e used. Some	terms may	be used more than	n once.	
	bina	ry	hard di	sk drive (HDD)	hexade	ecimal	operating syste	∍m	
	ра	pages random access me		om access memo	nemory (RAM) read o		nly memory (ROM))	
			sectors	software	tracks	virtual	memory		
	Virt	ual n	nemory is use	ed when the			is fu	ıll. It is	
	crea	ated	by partitioning	g the			Data is di	ivided into	
					that car	be sent fro	om		
					to the				
					to be te	mporarily st	tored until they are	required.	

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in the Cambridge Assessment International Education Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.
