February/March 2023

MARK SCHEME

Maximum Mark: 50

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the February/March 2023 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **13** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED**English & Media subject specific general marking principles****(To be read in conjunction with the Generic Marking Principles (and requiring further guidance on how to place marks within levels))****Components using level descriptors:**

- We use level descriptors as a guide to broad understanding of the qualities normally expected of, or typical of, work in a level.
- Level descriptors are a means of general guidance, and should not be interpreted as hurdle statements.
- Where indicative content notes are supplied for a question, these are *not* a prescription of required content, and must not be treated as such. Alternative correct points and unexpected answers in candidates' scripts must be given marks that fairly reflect the knowledge and skills demonstrated.
- While we may have legitimate expectations as to the ground most answers may occupy, we must at all times be prepared to meet candidates on their chosen ground, provided it is relevant ground (e.g. clearly related to and derived from a relevant passage/text and meeting the mark scheme requirements for the question).

English Language specific marking instructions:**AO1 Read and demonstrate understanding of a wide variety of texts. (Understanding)**

- Marks should be awarded for the accuracy of the candidate's understanding of the text and its features, **not** for any analysis of them which is recognised under AO3.
- Where comparison is required, marks should be awarded for the candidate's recognition of similarities and differences between the texts and their features, **not** for any consequent analysis.
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO2 Write effectively, creatively, accurately and appropriately, for a range of audiences and purposes. (Writing)

- Marks should be awarded equally on the basis of the level of the candidate's written expression (range of features used and accuracy) and the development of their writing (its organisation and relevance to task and audience).
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO4: Demonstrate understanding of linguistic issues, concepts, methods and approaches. (Conceptualisation)

- Marks should be awarded equally on the basis of the level of the candidate's understanding of the relevant issues, concepts, methods and approaches represented both in the text(s) and in their wider studies.
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

AO5: Analyse and synthesise language data from a variety of sources. (Data handling)

- Marks should be awarded equally on the basis of the level of the candidate's selection, analysis and synthesis of language data.
- When awarding a 'best-fit' mark within a Level for each AO, consider each bullet point equally.

Higher marks should be awarded where candidates identify patterns and offer thoughtful and plausible explanations for the features they are discussing.

Weaker answers may spot features or describe individual cases of language change without reference to broader considerations or examples.

Section A: Language change

Question	Answer	Marks
1	<p>Read <u>Texts A, B and C</u>.</p> <p>Analyse how <u>Text A</u> exemplifies the various ways in which the English language has changed over time. In your answer, you should refer to specific details from <u>Texts A, B and C</u>, as well as to ideas and examples from your wider study of language change.</p> <p>Mark according to the levels of response marking criteria in Table A.</p> <p>Additional guidance:</p> <p>The comments below are illustrative and are not intended to be exhaustive. Candidates may make other valid comments that should be credited.</p> <p>Candidates may organise their response in any appropriate way. They are not required to focus on lexis, grammar and syntax, orthography and graphology in separate sections.</p> <p>Responses might feature the following:</p> <p>Lexis and semantics</p> <ul style="list-style-type: none"> • There is a range of lexis used related to modern fashion, including <i>jumpsuit</i>, <i>T</i> and <i>athleisure</i>. Candidates may discuss the origins of this lexis. • Clipping is used in <i>beaut</i>, <i>gorge</i> and <i>sesh</i>. • Informal register is used e.g. <i>cute</i>, use of exclamation marks and direct address, as appropriate to the target audience. Older texts tend to be more formal in register. • The initialisms <i>PJs</i> and <i>BFF</i> are used. • The terms <i>inbox</i> and <i>out of office</i> are linked to the rise of communication technology. • The collective noun <i>squad</i> has undergone lexical broadening: this is used initially in Text A to mean ‘a group of friends’, but originally referred to a group of military men, then extended to include groups in sports and police work (as in the second instance in Text A). Text B exemplifies this. • <i>Bling</i> is a noun used to refer to shiny jewellery which was coined in the late 1990s and is still in use. 	25

Question	Answer	Marks
1	<p>Grammar</p> <ul style="list-style-type: none"> • There is evidence of grammatical conversion. For example, <i>lunching</i> has changed from a noun to a verbs with the addition of the <i>-ing</i> ending. • Using Text C, candidates may give reasons for the increasing use of hyphenation. • elliptical constructions e.g. <i>Feeling bold?</i> <p>Orthography</p> <ul style="list-style-type: none"> • Spelling is mostly standard as would be expected in a contemporary text. • Phonetic spelling in <i>pro-fesh</i> and <i>pro-fash</i>. <p>Graphology</p> <ul style="list-style-type: none"> • Capital letters are standardised and used for proper nouns and abbreviations. • Some phrases are hyphenated such as <i>white-T-under-black-jumpsuit</i>, which is an example of linguistic play that characteristically enhances the tenor between the writer and the audience. • *Yawns* uses punctuation in a way that would not be found in older texts. In contemporary informal texts e.g. SMS messaging, asterisks are used in this way to highlight paralinguistic features and add drama to the text.
